## What's New ?

### .....EnergyPlus

You may download EnergyPlus (version 1.0.0) by visiting our web site (<http://SimulationResearch.lbl.gov>) and clicking on "EnergyPlus 1.0" in the left-hand menu. Version 1.0.1 is scheduled for release in January 2002. It will have many new features, including window blinds, system auto-sizing, air-to-air heat pump and zone multipliers.

### .....New! 1,000-Zone DOE-2

DOE-2.1E modifications that allow users to model up to 1,000 zones have been sent to the Energy Science and Technology Software Center. Please contact **Ed Kidd** or **Walt Kelly**.

**NCI Information Systems, Inc.**  
**ESTSC**  
**P.O. Box 1020**  
**Oak Ridge, TN 37831**  
**[estsc@adonis.osti.gov](mailto:estsc@adonis.osti.gov)**

The DOE-2.1E *BDL Summary* has been updated to reflect the new limits on zones and other components (see p. 2).

### .....Download DOE-2.1E Basics

Dr. Sam C. M. Hui, head of the DOE-2 Resource Center in Hong Kong, has broken down the DOE-2.1E *Basics Manual* into pdf files and scanned them onto a CD. He offered it to us so that we may allow other DOE-2 users to download the files freely. Go to our web site at <http://SimulationResearch.lbl.gov> and click on "Documentation" under DOE-2 in the left menu, then click on the link to DOE-2.1E *Basics*. Alternatively, you may email us ([kl@ellington@lbl.gov](mailto:kl@ellington@lbl.gov)) and request the CD via regular mail.

### .....HVAC Continuing Education

The University of Washington at Seattle is presenting **Air Conditioning Design** (Jan 15). You may register online at [www.engr.washington.edu/epp/](http://www.engr.washington.edu/epp/)

## Changes to DOE-2.1E

Recent changes to DOE-2.1E are described. Shown at the left is the version number of DOE-2.1E, which is incremented for each change. Following is a short description of the changes, the initials of the author and date of change. Note that each version of DOE-2.1E includes all changes made up to and including that version number. Therefore, Version -116 includes all prior changes. You can determine which version of the program you are using by checking any of the output reports, where version *nnn* is indicated as DOE-2.1E-*nnn*.

### Join the EnergyPlus User Group

The developers of EnergyPlus have formed a support group in order to foster discussion and maintain an archive of information for program Users. We invite questions about program usage and suggestions for improvement to the code. This group is not meant to replace the primary support at EnergyPlus-Support@GARD.com.

**The main page:** [http://groups.yahoo.com/group/EnergyPlus\\_Support](http://groups.yahoo.com/group/EnergyPlus_Support)

**Send messages to:** [EnergyPlus\\_Support@yahoo.com](mailto:EnergyPlus_Support@yahoo.com)

**Files on the web site include:** SetEPlus.exe -- the usual install file  
Readme.pdf -- updated readme file  
V1ReleaseSource.zip -- zip of the current source code -- will be updated soon!  
Energy+.idd -- unbundled Data Dictionary  
SetEPlusPatch01.exe -- the patch install. Includes updated EnergyPlus.exe, documentation, etc. but no new input files (input files did not change).

For more information on EnergyPlus go to

*EnergyPlus is being developed by University of Illinois, CERL, and Lawrence Berkeley National Laboratory, with the assistance of the Florida Solar Energy Center, GARD Analytics, the University of Wisconsin, Oklahoma State University and others.*

### Join the BLDG-SIM Mail ing List

BLDG-SIM is a mailing list for users of building energy simulation programs like EnergyPlus, DOE-2, Trace-600, HAP, BLAST, ESP, SERIRES, TRNSYS, TASE, ENERGY-10 and others.

Because building simulation professionals are located worldwide, the BLDG-SIM list is an attempt to foster the development of a community of those users. Users of all levels of expertise are welcome and are encouraged to share their questions and insights about these programs.

The web page for BLDG-SIM is <http://www.gard.com/bldg-sim.htm>

Jason Glazer, P.E., Of GARD Analytics, Inc. Is the list administrator ([jglazer@gard.com](mailto:jglazer@gard.com)).

# GenOpt 1.1

## Generic Optimization Program

New in GenOpt 1.1 are an additional algorithm for multi-dimensional optimization, algorithms for one-dimensional optimization, and an algorithm for parametric runs in a multi-dimensional space. The new version allows

processing of multiple function values and has an improved graphical user interface.

GenOpt is a multi-parameter optimization program, available free of charge from LBNL. It automatically finds the values of user-selected design parameters that minimize an *objective function*, such as annual energy use, calculated by an external simulation program like EnergyPlus, SPARK, DOE-2, BLAST, TRACE, TRNSYS, etc. GenOpt can be used with any simulation program that has text-based input and output. It also offers an interface for adding custom optimization algorithms to its library.

Genopt 1.1 (with user manual) may be downloaded free of charge from

<http://SimulationResearch.lbl.gov> > GenOpt

## VisualSPARK

### Version 1.0

Available from Lawrence Berkeley National Laboratory, *VisualSPARK 1.0 allows you to build customized models of complex physical processes by connecting calculation objects. It is aimed at the simulation of innovative and/or complex building systems that are beyond the scope of programs like DOE-2 and EnergyPlus.*

The main elements of VisualSPARK are a **user interface**, a **network specification language**, a **solver** for solving simultaneous algebraic and differential equations, and a **results processor**. With the network specification language you create equation-based calculation objects, and link the objects into networks that represent a building's envelope or HVAC components or systems. The solver solves this network for user-specified input parameters. With the results processor you graphically display the results of the calculation. VisualSPARK runs under the Windows 95/98/NT/2000, SunOS, Solaris, Linux and HPUNIX operating systems.

VisualSPARK costs \$250. To purchase the program, go to  
<http://SimulationResearch.lbl.gov> > VisualSPARK > Purchase

If you would like to get an idea of what the program does before purchasing it, you can review the SPARK User's Manual, which can be downloaded from <http://SimulationResearch.lbl.gov> > SPARK

*VisualSPARK was developed by the LBNL Simulation Research Group and Ayres Sowell Associates, with support from the U.S. Department of Energy, Drury Crawley, program manager*

## Building Design Advisor 2.0

*Decision making through the  
integrated use of multiple  
simulation tools and databases*

The **Building Design Advisor (BDA)** is a Windows® program that addresses the needs of building decision-makers from the initial, schematic phases of building design through the detailed specification of building components and systems. The BDA is built around an object-oriented representation of the building and its context, which is mapped onto the corresponding representations of multiple tools and databases. It then acts as a **data manager** and **process controller**, automatically preparing input to simulation tools and integrating their output in ways that support multi-criterion decision-making. Version 3.0 of the BDA is now available for Beta testing and includes links to three main simulation tools for daylighting, electric lighting and energy analyses:

- **DCM**, a simplified daylighting simulation tool,
- **ECM**, a simplified electric lighting simulation tool, and
- the **DOE-2.1E** building energy simulation program.

ECM, the **new electric lighting simulation tool** in BDA 3.0 beta, is integrated through BDA with DOE-2. BDA's Schematic Graphic Editor allows placement of electric lighting luminaires and specification of reference points for daylight-based electric lighting controls. Moreover, BDA now has the capability of **running DOE-2 parametrically** to generate a plot that shows the relationship between effective aperture and energy requirements. BDA 3.0 beta provides the added functionality of working with either **English units or Metric units**.

Current research and development efforts are focused on the development of links to **Desktop Radiance**, a Windows 95/98/NT version of the **Radiance** lighting/daylighting simulation and rendering software.

The minimum and recommended system **requirements** to run the BDA software are as follows:

### Minimum

Pentium 75  
Windows 95, 98, NT 4.0.  
16 / 32MB RAM under Windows 95  
30 MB of larger hard disk space.  
640x480 or higher screen resolution.

### Recommended

Pentium 200 or better.  
Windows 95, 98, NT 4.0.  
24 / 64MB RAM under Windows NT 4.0.  
60 MB of larger hard disk space.  
1024x768 or higher screen resolution.

The BDA source code is available for licensing; if interested, please contact Dr. Papamichael at [K\\_Papamichael@lbl.gov](mailto:K_Papamichael@lbl.gov).

To learn more about the BDA software and to download a copy of the latest public version (BDA 2.0), please visit <http://gaia.lbl.gov/BDA>

The **Building Loads Analysis and System Thermodynamics (BLAST)** program predicts energy consumption, energy system performance and cost for new or existing (pre-retrofit) buildings.

BLAST contains three major sub-programs:

- **Space Load Prediction** computes hourly space loads in a building based on weather data and user inputs detailing the building construction and operation.
- **Air Distribution System Simulation** uses the computed space loads, weather data, and user inputs.
- **Central Plant Simulation** computes monthly and annual fuel and electrical power consumption.

## **Heat Balance Loads Calculator (HBLC)**

The BLAST graphical interface (HBLC) is a Windows-based interactive program for producing

BLAST input files. You can download a demo version of HBLC (for MS Windows) from the BLAST web site (User manual included).

## **HBLC/BLAST Training Courses**

Experience with the HBLC and the BLAST family of programs has shown that new users can benefit from a session of structured training with the software. The Building Systems Laboratory offers such training courses on an as needed basis typically at our offices in Urbana, Illinois.

Technical Editor, Cocoa Beach, FL

### **Abstract**

This document provides a detailed simulation analysis of a variety of energy conservation measures (ECMs) with the intent of giving design teams a basis for decision making. Designers are advised to aim for the lowest consumption building economically possible and to target the major energy users, lighting and air conditioning, to achieve that goal. Reductions in energy cost (\$) is provided for comparing relative performance of ECMs. Simple payback of ECMs appears in a chart in each section's Overview. Life cycle cost savings are in the Conclusions section. (DOE-2)

## Measured Impact of Advanced Windows on Cooling

Michael T. Anello, Danny S. Parker,

### **Abstract**

A significant portion of Florida's residential building stock consists of single-family homes with clear, single-pane, aluminum frame windows. Such windows can lead to considerable heat gain during the hot Florida summer. A side-by-side field test in two identical homes was conducted to evaluate the impact of high performance windows on space cooling demand under realistic conditions. (EnergyGauge and DOE-2)

## Lights ...!! Camera! ...!! HVAC ??

The Consumer Energy Center of the California Energy Commission has started an ambitious project; they have created training videos for building energy professionals. Four videos have been made to date with more to be added in the near future. Those available for immediate viewing are HVAC (ductwork), Insulation, Cool Roofs and Radiant Barriers. The videos take the form of informal discussions between two professionals, demystifying and discussing the subject matter. Even though their emphasis is on residential and small buildings, the web site is worth exploring, go to:

<http://www.consumerenergycenter.org/homeandwork/index.html>

## ENERGY-10, Version 1.3 with WeatherMaker

**Version 1.3 of ENERGY-10** is now available. It includes the much-anticipated **WeatherMaker** function. *WeatherMaker* allows users to create their own weather files based on information available from nearly 4,000 weather stations throughout the U.S. Revisions to the program itself include some minor fixes, an improved and expanded Help section, and greater clarity in titling and identification of various sections. Contact the Sustainable Buildings Industries Council for more information, or to order your upgrade disc (the cost is \$15, which covers production and shipping).

**ENERGY-10**, written in C++, is a design tool for smaller residential or commercial buildings that are less than 10,000 ft<sup>2</sup> floor area, or buildings that can be treated as one- or two-zone increments. It performs whole-building energy analysis for 8760 hours/year, including dynamic thermal and daylighting calculations. ENERGY-10 was specifically designed to facilitate the evaluation of energy-efficient building features in the very early stages of the design process.

**Input:** Only four inputs required to generate two initial generic building descriptions. Virtually everything is defaulted but modifiable. As the design evolves, the user adjusts descriptions using fill-in menus (utility-rate schedules, construction details, materials).

**Output:** Summary table and 20 graphical outputs available, generally comparing current design with base case. Detailed tabular results also available.

**Platform:** PC-compatible, Windows 3.1/95/98, Pentium processor with 16 MB of RAM is recommended.

# DesiCalc 2.0

## Desiccant Screening Software

### Overview

DesiCalc allows you to do quick accurate screening evaluations of desiccant dehumidification applications. Using DOE-2.1E for accurate flexible simulations and a library of common applications, energy professionals have been using DesiCalc since 1998. Working from customer suggestions, the program has been expanded to DesiCalc 2, with the following new features.

### New Applications

- Full-Service Restaurant
- Industrial Building

### New Building Description Features

- User can modify building geometry
- Control of multiple zones/areas
- User control of building construction from a pre-packaged library
- Drawings of building floor plans

### New Internal Loads and Controls Features

- User inputs for gas equipment and refrigeration loads
- User control of latent and exhaust fraction for gas and electric loads
- Separate schedules for gas and electric equipment
- User control of school schedule for summer period
- User can set humidity control by zone for multiple zone applications

### New HVAC Features

- Variable-air-volume option available
- User control of cold deck temperature
- Outside air options (nursing homes)
- Improved handling of corridor outside air to provide better humidity report
- User control of desiccant pre-cooling coil
- User control of desiccant regeneration energy source - gas or electric
- User control - heat/reheat efficiency

### New Output Features

- Humidity plots for multiple zones
- Report hours humidity exceeds comfort set point by zone
- Go-to-next-back feature
- File name, time run, time print stamp on output reports
- New short report for multiple zones
- Improved reporting of building and equipment details
- Reporting of supply and outside air
- Gas and electric costs reported by end-use
- Improved help module with new graphics Manual on CD

### Technical Support

- Technical support is available by telephone at:
  - Toll Free for North America 877-DESICALC (877-337-4225)
  - Outside North America 847-698-3322

**Purchase DesiCalc 2.0** for US\$295 plus shipping and handling

**Upgrade to DesiCalc 2.0** for US\$40 plus shipping and handling

## INTERNATIONAL DOE-2 RESOURCE CENTERS

The people listed here have agreed to be primary contacts for DOE-2 program users in their respective countries. Each resource center has the latest program documentation, all back issues of the User News, and recent LBNL reports pertaining to DOE-2. Users may make arrangements to photocopy the new material for a nominal cost. We hope to establish centers in other countries; please contact us if you want to establish a center in your area.
